

**Company Overview**

Serving 70% of the Fortune 100, RMG is the global leader in intelligent visual communications. Our location-based video networks help connect companies with their target audiences—from consumers to business decision-makers to employees. And our complete enterprise video network solutions empower organizations to better run their business by visualizing critical, real-time data.

**Company Boilerplate**

RMG NETWORKS (NASDAQ: RMGN) is a worldwide leader in intelligent visual communications that helps businesses increase productivity, efficiency and engagement through digital messaging. By combining best-in-class software, hardware, business applications and services, RMG Networks offers a single point of accountability for integrated data visualization and real-time performance management. The company, who values 70% of the Fortune 100 as clients, is headquartered in Dallas, Texas, with additional offices in the United States, United Kingdom, Singapore and the United Arab Emirates. For more information, visit [www.rmgnetworks.com](http://www.rmgnetworks.com).

**Visual Internal Communications Solutions**

Workforce communication in today's fast-paced world is never easy and the demand continues to increase daily. Visual internal communications provides the flexibility to quickly broadcast messages that grab employee attention and increase awareness, cutting through the clutter from competing sources like emails, texts, social media, news and advertising.

RMG Networks forges the way to propel organizations to the next level of productivity with engaging and intelligent solutions for visual internal communication. From boardroom to the breakroom, across the hall or across the globe, RMG Networks visual solutions make it possible to convey important company information instantly.
